VITALVISION NEWS

The state office will not be implementing the VitalChek electronic registration system, VitalVision. Letters have been sent to the hospitals, funeral directors, medical examiner and physician who have agreed to be our pilots for the new system. Letters will also be sent to all hospitals, informing them of the change in plans.

We know that everyone has been looking forward to the new registration system. Vital Statistics will be bidding the development of an electronic web based system in early 2002. There will be some re-engineering to include processes not in the original requirements. We will continue to keep folks informed via the newsletter, monthly conference calls, and plain old, everyday talking to one another. As for now, it will be *business as usual* in the counties and the state office.

You are encouraged to contact the state office if you have questions or concerns regarding the status of electronic registration. You may contact Ken Jones, Deputy State Registrar at (904) 359-6982, SunCom 826-6982 or contact your quality assurance field representative.

PHYSICIANS & FUNERAL DIRECTORS: "AFFIDAVIT OF AMENDMENT TO MEDICAL CERTIFICATION OF DEATH (DH 434), 2/97", IS THE CURRENT FORM FOR AMENDING CAUSE OF DEATH. OLDER VERSIONS OF THE FORM ARE OBSOLETE & WILL NO LONGER BE ACCEPTED AS OF JANUARY 1, 2002. SEE YOUR CDR FOR THE CORRECT FORM.

CHIEF DEPUTY REGISTRAR ADVISORY COMMITTEE (CDRAC)

The CDRAC group has been involved in a pilot process for the state office. Jim Ballard, Current Registration, asked us and Brevard County to pilot a procedure for reconciliation of vital records transmitted to the state office. Once the process has been reviewed, all CHDs will be advised on the procedure and when to implement.

The recent audit conducted in ten county health departments has prompted several proposed procedural changes. These changes, related to security paper, voided records, cash intake and more will affect how all of us do business, but we will work together to achieve a uniform vital statistics program.

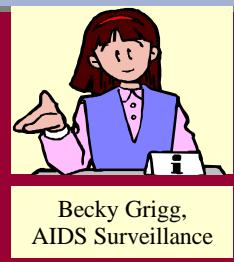

We were disappointed to learn of the cancellation of the contract with VitalVision. It is good to know that the state office will still be pursuing the system best suited to all of our needs. Much has been

OUR "GUEST" TO YOU

Becky Grigg,
AIDS Surveillance

AIDS became a reportable disease in Florida in 1983. On July 1, 1997, Florida implemented confidential name reporting of HIV infection. **HIV/AIDS** data play a vital role in how Florida determines HIV/AIDS needs, resource allocation, program planning and implementation. By the end of August 2001, Florida reported 84,066 cumulative AIDS cases and 22,251 HIV cases (not yet AIDS). A strong reporting infrastructure within Florida's 67 counties is the cornerstone of our successful surveillance system.

Florida utilizes a combination passive and active surveillance system for reporting HIV and AIDS cases that is strongly laboratory-based. Any physician who initiates an order resulting in a positive HIV test or makes a diagnosis of HIV on or after the effective date of July 1, 1997, is required to report the results. In addition, any person in charge of a laboratory who receives the initial order to perform an HIV test or processes an HIV test is required to report the positive results. Surveillance staff execute active case-finding strategies through regular medical record reviews, death certificate reviews and contact with local community-based organizations, private providers, hospital infection control staff and laboratory personnel.

Death certificate reviews serve as a last mechanism for capturing unreported cases and are an important piece in making sure that all cases are found and reported.

AIDS—(Continued on page 2)

SUBMISSION OF BURIAL-TRANSIT PERMIT

It's time to talk about burial-transit permits again. Burial-transit permits must be submitted to the vital statistics office in the county where the death occurred within 5 calendar days after death and prior to final disposition (s 382.006, F.S.). Subregistrars are requested to forward the Local Registrar (pink) copy of the BTP within 24 hours after completion, as is instructed on the bottom of the pink copy.

It is permissible to fax the BTP to the county vital statistics office. Not all VS offices have fax machines located in their office, so make sure that the BTP is accompanied by a fax cover sheet and follow-up with the county to assure that it arrived.

The BTP must be completed in its entirety. Remember to be sure to include the date the record is due (hint: 5 calendar days after death and/or the additional 5 work days if extension is granted). Beginning January 1, 2002 all BTPs not completed properly will be returned. This may place you in noncompliance. Noncompliance with Chapter 382 may result in an administrative complaint being filed against you. An administrative fine of \$1,000.00 per day can be levied.

If you have questions about the completion and/or submission of burial-transit permits, please refer to the recent Instructional Memorandum 3, Proper Use of Burial-Transit Permit, dated November 6, 2001; the Vital Records Registration Handbook or contact your local Chief Deputy Registrar.

VS RESPONDS TO SEPTEMBER 11 TRAGEDY

It has been three months since the tragic morning of September 11, 2001. Much has been said about heroism, patriotism, democracy, pride and the undaunted courage of this great nation.

Folks here at the State Office of Vital Statistics, along with our co-workers in the State Laboratory have joined together, as so many have, to participate in some small way to show our support. Employees responded immediately with a generous donation to the Red Cross rescue and relief efforts. A blood drive was organized with strong participation. A letter was sent from Florida's Vital Statistics office to the office in New York City, offering support from our employees to theirs.

We continue to offer our prayers and support to the leaders of our country, the decision makers behind the scenes, and to the members of our armed forces and their families who will take an active part in "Operation Enduring Freedom".

CLERK'S CORNER

We are asking for the assistance of the Clerks of Circuit Court in improving the quality of print and the completion of information on both the Marriage Record (DH 743) and Dissolution of Marriage (DH 513).

Print quality of records is important to many different agencies for the archival/recording process. Black ink should be used for computer printing as well as especially dot matrix, should be set on letter quality or double strike. Please make sure to replace the ribbons/ink cartridges before the print appears to be light. Also, make sure the printers correctly to avoid misaligned text.

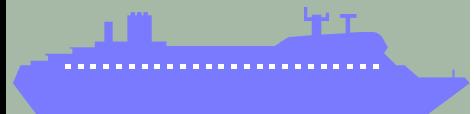

To ensure data quality, all forms should be completed in their entirety. We have received quite a few Dissolution of Marriage forms that have items blank or showing "not stated", e.g. residence items 6a-d.

Vital Statistics would like to thank the Clerks of Circuit Court for their cooperation, support and compliance with s. 382.021 and 382.023, F.S.. Clerks are welcome to mail records more frequently than once a month. Please include a Marriage Transmittal Form (DH133) or Dissolution of Marriage Transmittal Form (DH730).

AIDS—(Continued from page 1)

In collaboration with local and Chief Deputy Registrars, HIV/AIDS surveillance staff routinely review death certificates at county health departments. In addition, approximately 150 death certificates per month with cause of death due to HIV/AIDS are received at headquarters from the state Office of Vital Statistics. These are "processed" by matching them against the HIV/AIDS Reporting System (HARS) and the Out of State registries. Certificates are sent to the field for follow-up, as needed. With the assistance of Chief Deputy Registrars at the local level, 2% of Florida's AIDS cases reported between 7/00 – 6/01 originated from death certificates. This is an indication of how important your contribution is to the completeness of our reporting. These cases would not have been found otherwise. Your help is **"vital"** and we would like to thank you for your assistance.

Welcome Aboard

The following appointments have been made to the position of **Registrar**:

Chief Deputy Registrar:

Jean Coxwell.....Jefferson County

Linda Cisneros.....Glades County

Connie Sweet.....Taylor County

GREETINGS FROM THE STATE REGISTRAR

2001 has been an eventful year. For everyone this past year, public health has been in the limelight and sometimes under the microscope. In Florida we have seen, first hand, the importance of maintaining a strong public health system and we can be proud of our performance under very trying circumstances. Events of September 11 have made all of us in vital statistics think of the enormity of the job our colleagues face in New York, Washington D.C. and in Pennsylvania. We salute their efforts in assisting people from all over the world.

In late October, we announced that our electronic registration system had been delayed. Working with VitalChek in the development of the VitalVision system helped us see that we needed more from the system than we had originally required. Funding and a clicking time clock have prompted us to re-evaluate our needs and return to the drawing board. In the coming months, we will be eagerly pursuing an electronic system that will streamline and simplify the registration process.

This time of year affords us the opportunity to thank the many people who help us maintain one of the best registration systems in the country. We appreciate the continued support of the county health departments and other agencies with whom we partner to provide quality data. The Chief Deputy Registrar Committee (CDRAC) has been an asset to vital statistics this year, and we thank them for their ideas and input. We will continue to rely on them in the months ahead. Implementation of monthly conference calls with county chief deputy registrars has helped to keep everyone informed and up to date on happenings in vital statistics. These calls are an opportunity for counties to have input and get information directly. As always, we thank all vital statistics staff for their continued efforts in assisting Florida's citizens.

Best wishes for a joyous holiday season!!

CHANGES IN LATITUDE

Well, Helen Miller has gone and done what she threatened to do—she retired! Effective October 31 (how fitting), Helen has moved part and parcel to the cabin in Melrose. We wish her the best and there is no question that she will enjoy herself!

As one leaves, we have an addition to the VS family. Mike Grant has joined the Quality Assurance Unit and will be the third field representative. He comes to us with high recommendations from the Board of Nursing and we look forward to working with him. Mike's territory will cover several of the counties in south Florida and he can be reached at (904) 359-6900 ext. 1056 or SunCom 826-6900 ext. 1056. We welcome Mike to the vital statistics family.

USING THE VITAL RECORDS HANDBOOK

When quality assurance makes a field visit, one of the first questions asked is, "where is your handbook?". When calls are received in the state office, you will commonly hear, "what does the handbook say about that?" It is important to utilize this resource when faced with questions such as "what should I do if...", "how am I to enter this..." or "who is supposed to...". Every effort is made to address common issues that arise when completing vital records.

There are chapters specific to registering births, deaths and fetal deaths, with item by item instructions for each record as well as an explanation of various responsibilities in registering vital records—who should do what. There is a glossary of commonly used vital statistics terms, copies of vital statistics related statutes, e.g. chapter 382, F.S. (VS law), chapter 64V-1, F.A.C. (VS rule), and s. 406.11, F.S. (ME law).

Funeral directors, subregistrars, medical examiners, hospital birth registrars, and county registrars should be familiar with the Vital Records Registration Handbook. If you do not have the current version (Revised July 2000), you should contact your chief deputy registrar (CDRs, the handbook is available on the interdepartmental website for downloading and providing to area professionals at www.dohiws.doh.state.fl.us/). This handbook should be the reference mainstay of the well equipped vital statistics library!!

CDRAC—(Continued from page 1)

learned about our work processes, in conjunction with those at the state level and we, as a committee, feel that it has been a good experience. We look forward to continuing the effort.

Another note, Sharon Nixon, CDR, Duval County has retired. Sharon was a member of the CDRAC and a respected colleague of many years. We will miss her presence on the committee.

BITS 'N PIECES

- ◆ It will soon be a new year, 2002. Watch the **dates entered on vital records**. Be sure not to get stuck in 2001. These errors make for additional queries and sometimes delays for families. Turn the calendar over and use it!
- ◆ Effective January 1, 2002, **birth cards or wallet cards** will no longer be issued in Florida.
- ◆ CDRs, don't forget to dial-in to the monthly **CDR conference calls**. Time, date, and number to call is provided with the call agenda.
